How to encourage your child to give more than one word answer during a conversation?

To keep the conversation moving with your kids, here are a few tips:

- Listen: With some questions, you may be tempted to jump in and give the "right" answer. But your kid learns better from a good conversation where you foster a healthy discussion.
- Younger ones first: If you have a toddler or preschooler, you may have the best luck with having your youngest child go first because otherwise, they tend to just repeat what the person before them said. Which is still adorable, but it's also fun to hear what's bouncing around inside that growing little mind.
- I don't know: If your kid says, "I don't know," explain that there's no right or wrong answer. You just want to hear their ideas. If they still have nothing, you can say, "We'll give you a minute and come back to you" then move to the next person at the table.
- Surprising answer: If your kid's answer happens to shock you, try saying "Hmm" or "Interesting" - something noncommittal to give you time to collect yourself. If you freak out on your kid, they'll clam up. These conversations should be fun, not stressful!
